Little Ruby™

Alternanthera dentata 'LRU30' PBR Intended

EMPORIUM
RANGE

A compact, spreading
Alternanthera with beautiful
deep burgundy foliage.

Little Ruby is the perfect mounding groundcover with a compact, spreading habit. It is approximately a third the height of the common form and its deep burgundy colour is a real stand out in the landscape.

Like most *Alternantheras*, Little Ruby can work in full sun to shade. In cold climates, Little Ruby will need to be planted in a sheltered position to protect it from frost. This *Alternanthera* loves humidity.

Common
Alternanthera dentata

Little Ruby
